Take advantage of technological advances for your daily work!

When it comes to new technologies in the digital printing market, the developers and product management at Neschen AG are always keen to reduce the number of unnecessary ICC profiles. One result is that Neschen AG, together with the newly formed „Color Alliance“, has developed a new coating, which is being used in more and more media. Test have shown brighter colours and less ink usage when using our CA-Media. It also reduces the profiling effort at our customers. In addition, worldwide reproducibility of a print is guaranteed by the standard coating.

The Color Alliance

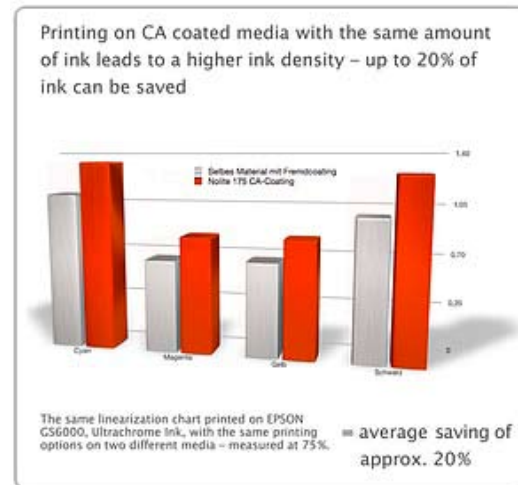

As a global alliance it unites the leading international printing media and software manufacturers. The aim of the close collaboration is to simplify production processes in the field of large-size inkjet printing and to boost productivity and process reliability for printing service providers, dealers, print buyers and end users. The basis is a standardized coating which drastically reduces the number of color profiles and ensures the color accuracy of inkjet prints.

The key benefits of Color Alliance:

- Concerted products
- Standardized coatings
- Reduced ink consumption
- Less profiling effort
- 100 % quality control
- Complete media range
- Measurable print quality
- Perfect colour management through CA profiles
- Trainings, Publications
- Increased productivity

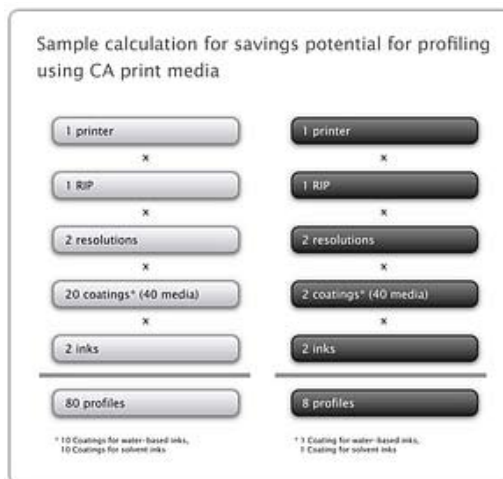

Reduction of ink consumption

Save up to 20 % of ink using CA Print Media

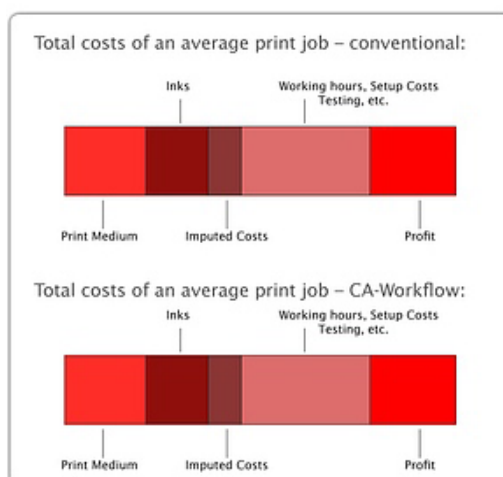

Less Profiling effort

Profiling effort will be reduced using CA Print media – sample calculation

Increase your productivity

Increase your productivity and margin

Neschen CA Inkjet Media

Neschen AG offers a large selection of inkjet media with the specific CA-coating. All CA-media is constantly improved and developed and coated in our own factory in Bückeberg.

In close cooperation with the Color Alliance and our customers we are always expanding our range of CA-media.

Our recommendation for eco solvent, solvent and UV-curable inks:

solvoprint nolite 175 CA

175µm polyester compound, absolutely opaque, unique Color Alliance inkjet coating, also printable with latex inks, matt, especially suitable for roll-up displays offering a perfect flatness, scratch-resistant and waterfast surface

solvoprint easy panel 310 B1 CA

310µm, hard PVC, highly scratch-resistant unique Color Alliance inkjet coating, opaque appearance, ideal for end caps of smaller Pop Up displays, water-resistant, fire certification B1 according DIN 4102-1

solvoprint easy panel 430 B1 CA

430µm, hard PVC, highly scratch-resistant unique Color Alliance inkjet coating, opaque appearance, ideal for Pop Up displays, water-resistant, fire certification B1 according DIN 4102-1

solvoprint PP sand CA

220 µm clear polypropylen film with a sand finish, Color Alliance (CA) inkjet coating on the smooth printing side, scratch resistant surface, dimensionally stable, specially designed for display panels (e.g. Pop-Up) in conjunction with filmolux easy panel

Our recommendation for waterbased inks:

printlux nolite 175 CA

175µm polyester compound, absolutely opaque, unique Color Alliance inkjet coating, matt, especially suitable for roll-up displays offering a perfect flatness, water-resistant and colour-fast if printed with pigmented

printlux easy panel 310 B1 CA

310µm, hard PVC, scratch-resistant unique Color Alliance inkjet coating, opaque appearance, ideal for end caps of smaller Pop-Up displays, water-resistant and colour-fast if printed with pigmented inks, fire certification B1 acc. DIN 4102-B1

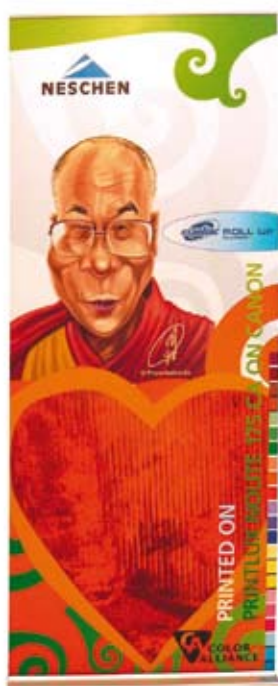

printlux easy panel 430 B1 CA

430µm, hard PVC, scratch-resistant unique Color Alliance inkjet coating, opaque appearance, ideal for Pop-Up displays, water-resistant and colour-fast if printed with pigmented inks, fire certification B1 according DIN 4102-B1

printlux PP sand CA

220µm clear polypropylen film with a sand finish, Color Alliance (CA) inkjet coating on the smooth printing side, scratch resistant surface, dimensionally stable, specially designed for display panels (e.g. Pop-Up) in conjunction with filmolux easy panel
