ABOUT US

130 YEARS OF NESCHEN

From purveyor to the court to the leading international manufacturer – as the company that invented modern book protection films, Neschen can look back on 130 years of experience. Our innovative products for book protection and book repair are used worldwide by many famous libraries, institutions and archives.

ENVIRONMENTALLY FRIENDLY PRODUCTS

Environmental awareness is a distinguishing feature of Neschen, and this is a high priority for the company. All adhesives are free from acids and solvents. When selecting raw materials, we also take great care to ensure they contain no heavy metals such as cadmium, mercury, lead, or any other hazardous additives.

ANTIBACTERIAL

Protection films protect books from damage. They are washable and resistant to a wide range of cleaning agents and solvents, and, in addition, many of Neschen book protection films have an anti-bacterial effect. They are tested by an independent testing institute according to ISO 22196. For the safety of readers and lenders, we recommend a hygiene concept. After cleaning, and an additional 24–48 h quarantine, a book with Neschen filmolux® book protection film can be returned to the library without any risk.

BOOK PROTECTION

FILMOLUX® SOFT

Self-adhesive book protection film
Crystal-clear, glossy filmolux® soft increases the life of your books by protecting them from contamination and damage. Thanks to the reduced initial adhesion, filmolux® soft is easy to apply bubble-free by hand and easy to correct while processing. filmolux® soft is suitable for smooth surfaces, such as paper and glossy covers, brochures and folders, paperback books and comics.

FILMOLUX® SOFT ORGANIC

Self-adhesive book protection film
Transparent, glossy filmolux® soft organic is an environmentally friendly book protection film made based on sugar cane. Sugar cane absorbs CO₂ from the atmosphere during its growth, significantly improving the greenhouse gas emissions balance. It has the same features as filmolux® soft.

FILMOLUX® 609

Self-adhesive book and label protection film
With high initial adhesion, filmolux® 609 can be used on almost all book covers. The narrow rolls are ideal as protection for labels and signatures, bottle labelling in drugstores and laboratories. They can be cut with our tape dispenser TA 3 perfectly. filmolux® 609 in wider rolls is suitable for working with the BLS-Professional.

BOOK REPAIR

FILMOPLAST® P

Self-adhesive transparent paper repair tape
filmoplast® P enables almost invisible repair, such as torn pages, sheet music, or drawings. On photocopies or when scanned, it remains invisible. The adhesive is solvent- & acid-free, ageing-resistant, non-yellowing and slightly alkaline buffered with CaCO₃ (Calcium carbonate) to prevent acid decay.

FILMOPLAST® P 90

Self-adhesive white paper repair tape
filmoplast® P 90 is for attaching torn out pages, reinforcing and repairing the inner book joint and repairing edges. The adhesive is solvent- & acid-free, ageing-resistant, non-yellowing and slightly alkaline buffered with CaCO₃ (Calcium carbonate) to prevent acid decay.

FILMOPLAST® P 90 PLUS

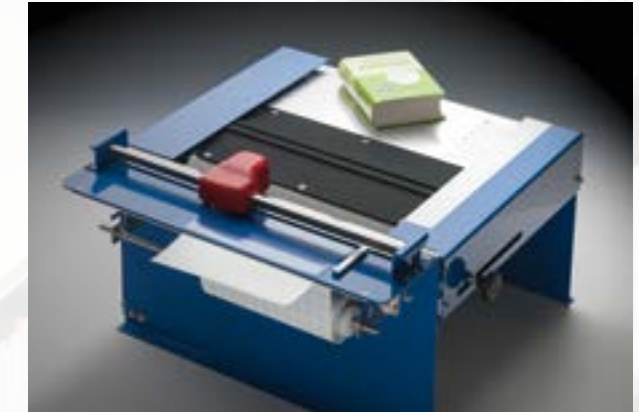

Extra strong self-adhesive white paper repair tape
With extra high initial adhesion and high tear resistance, filmoplast® P 90 plus is ideal for strengthening the joint between book cover and book block. The adhesive is solvent- & acid-free, ageing-resistant and non-yellowing.

FILMOPLAST® T

Self-adhesive colored textile tape
filmoplast® T is for laminating book covers or reverse-side strengthening of maps and plans. Available in eight colors, dyed with natural colors. The adhesive is pH-neutral, solvent- & acid-free, ageing-resistant and non-yellowing. Suitable for working with our tape dispenser TA 3.

PROCESSING DEVICES

NESCHEN BLS-PROFESSIONAL

Book Laminating Station
The Book Lamination Station is a device for professional use and faster lamination of whole book series. Besides, an integrated scale for measuring the book size, easy gripping in of the laminate and highly effective mounting device leads to the fact that the BLS-Professional is a time saving and efficient operating system.

TAPE DISPENSER TA 3

Heavy cutting device with two adjustable sizes
The unique tape dispenser TA 3 is a stable unit that cuts label out of narrow rolls (up to 8 cm) of book protection films as well as out of our textile repair tapes.

NESCHEN BURNISHING BONES

For professional processing of our products
Made of traditional bone or from Teflon, the burnishing bones are the perfect tools for applying our filmolux® book protection films or filmoplast® repair tapes.

NESCHEN BOOK SQUEEGEES

Easy processing of book protection films
Made of wood with a soft felt edge or 100 % felt, these are the perfect tools for applying filmolux® book protection films.
