3. Supporter
Umbrella-rib type supporters are connected to the base tank and firmly hold the pole.

4. Arm
The arm is connected to the top of the pole and holds the top of the banner.

5. Ring
Four rings are attached to the pole and provide natural rotation of the banner by wind.
Three rings are attached to the arm to hold the top of the banner.

6. Bracket
The bracket surrounds the pole and connects with the supporters.

7. Release Button
Ball-type buttons make easy releasing and folding.

8. Stopper
The stopper prevents the banner from rolling in wind.
Slide it above the lowest ring after installation.
